**FUEL CARTRIDGE, FUEL CELL AND PORTABLE ELECTRICAL APPLIANCE
INCLUDING FUEL CELL**

Examiner: Suitte 10/596,275 Art Unit: 1795 July 3, 2008

Election/Restrictions

1. Applicant's election with traverse of Group I claims 1-5, in Paper filed June 2, 2008 is acknowledge. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Thus, claims 6-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected fuel cell with a discharge amount control section and a nonelected fuel cell with an oxidizing treatment section, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Hibino et al. (US 2003/0094002).

Regarding claims 1 and 2, Hibino discloses a storage device (fuel cartridge) for a gas, a vapor-liquid separator (gas-liquid separation film) for separating the liquid from

the gaseous stored material (vaporized liquid fuel). See paragraph 55. Hibino discloses a storage device chamber that stores the dissolved gas in hydrocarbon liquid. See paragraph 219.

Regarding claim 3, Hibino discloses a gas liquefying and storing system for gas comprising a shutter (94) that operates the opening and closing of the storage device. See paragraph 242 and figure 37.

Regarding claim 4, Hibino discloses a discharge port that discharges fuel from the fuel storage device that is separated by a vapor-liquid separator. See figure 30 and paragraph 55.
